Art Unit: 1761

1. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, "the insoluble matter" lacks antecedent basis.

In claim 3, "the main... acid" lacks antecedent basis.

In claims 8, "the protein used" lacks antecedent basis.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 6 is rejected under 35 U.S.C. 102(b) as being anticipated by either one of Applicant's own admission (see page 1) or WO 97/49298 and under 35 U.S.C. 102(b) as being anticipated by WO 99/03892.

Any one of the references applied herein disclose the pectin produced from potato or other root vegetables.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1761

Claims 7-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 97/49298.

WO 97/49298 further discloses using said pectin in a variety of foods including beverages. Although the claims call for its use in acidic proteinaceous foods such as milk-containing coffee and WO 97/49298 is silent concerning this specifically, it would have been obvious to one having ordinary skill in the art at the time of the invention to have employed said pectin in any beverage as a matter of preference for the use disclosed in WO 97/48298.

4. Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Claims 2-5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The prior art of record does not disclose or teach the particular process of preparing pectin from a root vegetable wherein an emulsifier is used during extraction as specifically claimed.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
